# Office Action Summary

Application No.	Applicant(s)	
10/073,618	CAO ET AL.	
Examiner	Art Unit	
Asghar Bilgrami	2143	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

- 1) ☒ Responsive to communication(s) filed on 10 August 2006.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## Disposition of Claims

- 4) ☒ Claim(s) 1-58 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 1-58 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

## Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 11 February 2002 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

## Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some \* c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
  - ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
  - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- \* See the attached detailed Office action for a list of the certified copies not received.

## DETAILED ACTION

### ***Claim Rejections - 35 USC § 112***

1. The examiner has withdrawn the 35 U.S.C. 112, first paragraph, in view of applicant's amendments and arguments.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-58 are rejected under 35 U.S.C. 103(a) as being unpatentable over Schilling (U.S. Pub No 2003/0182447 A1) and Davallou (U.S. 6,976,019 B2).
3. As per claims 1, 15-18, 36, 38, 39, 40, 55-57 & 58 Schilling disclosed a computing system, a method for providing runtime automatic universal resource locator (URL) analysis and suggestion in connection with a service accessed from a client computing device utilizing a URL input mechanism, comprising: inputting URL input to the URL input mechanism of the client computing device (page.2, paragraphs.10 & 16). However Schilling did not explicitly disclose determining whether the URL input is valid and if invalid, transmitting said URL input to a server computing device for intelligent

Art Unit: 2143

rules-based analysis of the invalid URL input; transforming the invalid aspects of the invalid URL and outputting at least one valid alternative URL based upon said analysis, and suggesting at least one of the alternative URL.

In the same filed of endeavor Davallou disclosed determining whether the URL input is valid (col.2, lines 30-54) and if invalid, transmitting said URL input to a server computing device for intelligent rules-based analysis of the invalid URL input; transforming the invalid aspects of the invalid URL (col.13, lines 48-67 & col.4, lines 1-28) and outputting at least one valid alternative URL based upon said analysis, and suggesting at least one of the alternative URL (col.6, lines 7-50).

It would have been obvious to one in the ordinary skill in the art at the time the invention was made to have incorporated determining URL validation and the rules based URL correction as disclosed by Davallou in a computing system utilizing a URL input mechanism disclosed by Schilling in order to provide and promote most likely or accurate URL matches to the user resulting in creating an environment that is user friendly and facilitates the user in their URL search task.

4. As per claims 2, 21 & 43 Schilling-Davallou-Davallou disclosed a method according to claim 1, wherein the at least one database of known URLs includes a dynamically updated database of current URLs (Schilling, paragraphs.17, 19 & 26).

Art Unit: 2143

5. As per claims 3, 22 & 44 Schilling-Davallou disclosed a method according to claim 1, wherein the at least one database of known URLs includes a top URL list checked before any other database (Schilling, paragraphs.17, 19 & 26).
6. As per claims 4, 23 & 45 Schilling-Davallou disclosed a method according to claim 3, wherein the at least one database of known URLs includes secondary list which is analyzed after the top URL list if at least one alternative URL is not found based on an analysis of the top URL list (Schilling, paragraphs.17, 19 & 21).
7. As per claims 5, 24 & 46 Schilling-Davallou disclosed a method according to claim 4, wherein the at least one database of known URLs includes a complete list of URLs which is analyzed after the secondary list if at least one alternative URL is not found based on an analysis of the secondary list (Schilling, paragraphs.17, 19 & 21).
8. As per claims 6, 19 & 20 Schilling-Davallou disclosed a method according to claim 1, further including preprocessing the URL input to at least one of (1) remove non-domain name service (DNS) characters (2) to replace non-DNS characters and (3) to correct an error in protocol (Schilling, Page.3, paragraphs. 23, 24 & 27).
9. As per claims 7, 25 & 47 Schilling-Davallou disclosed a method according to claim 1, wherein the client device includes a browser and the URL input is URL input

intended for one of navigation to a Web site and search on a Web site (Schilling, page.2, paragraph.16).

10. As per claims 8, 26 & 48 A method according to claim 1, further including displaying the suggested alternative URLs to the user via an error page (Schilling, page.3, paragraph.24).

11. As per claims 9, 27 & 49 Schilling-Davallou disclosed a method according to claim 8, further including performing a search with the URL input as a query and displaying the results of the search on the error page (Schilling, page.3, paragraphs. 23 & 24).

12. As per claims 10, 28, 37 & 50 Schilling-Davallou disclosed a method according to claim 8, further including displaying a link on the client computing device error page, which link, if input by the user, retries the original URL input (Schilling, page.3, paragraph.24).

13. As per claims 11, 29 & 51 Schilling-Davallou disclosed a method according to claim 8, further including tracking user behavior in response to the display of the error (Davallou, col.3, lines 48-67 & col.4, lines 1-28).

Art Unit: 2143

14. As per claims 12, 30 & 52 Schilling-Davallou disclosed a method according to claim 55, wherein the at least one database includes URLs that are weighted according to their popularity (Schilling, page.1, paragraph.8).

15. As per claims 13, 31 & 53 Schilling-Davallou disclosed a method according to claim 1, wherein said rules based analysis includes applying rules from a rules based table (Schilling, paragraphs.17, 19 & 21).

16. As per claims 14, 32 & 54 Schilling-Davallou disclosed a method according to claim 1, wherein said rules based analysis includes applying rules to the analysis based upon said at least one known URLs database (Davallou, col.3, lines 48-67 & col.4, lines 1-28).

### ***Response to Arguments***

Applicant's arguments with respect to claim1-58 have been considered but are moot in view of the new ground(s) of rejection applied on the amended claims.

***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Asghar Bilgrami whose telephone number is 571-272-3907. The examiner can normally be reached on 9-5.

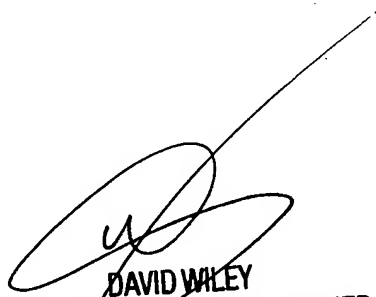

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Wiley can be reached on 571-272-3924. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
